## 1 PREMESSA

Il presente documento costituisce i tabulati delle verifiche idrauliche a supporto dello studio idrologico-idraulico di supporto al Piano Operativo del Comune di Capraia e Limite.

I risultati sono suddivisi per modello.

Si ricorda che ai fini della stabilità numerica della modellazione idraulica e del contenimento dei tempi di calcolo è stato necessario suddividere il reticolo idrografico di studio in 5 differenti sottosistemi.

Questi sono così composti:

- modello 1: contenente il Rio Morticini;
- modello 2: contenente il Rio Botricello, il Rio Pescaione e il Rio Ratto;
- modello 3: contenente il Rio Granchiaia e il Borro della Badia;
- modello 4: contenente il Borro di Forraccia e il Borro dei Diavoli;
- modello 5: contenente il Rio Olmo, il Rio Guidi e il Rio dei Tassi.

Sono riportati i risultati per i due tempi di ritorno analizzati, pari a 30 e 200 anni, ciascuno per le durate di 0.3, 0.5, 1, 1.5, 2, 3, 4 e 5 ore.

## 2 TABULATI VERIFICHE IDRAULICHE MODELLO 1

### 2.1 RIO MORTICI

#### 2.1.1 TEMPO DI RITORNO 30 ANNI
